El atributo lang

Siempre debe incluir el `lang` atributo dentro de la `<html>` etiqueta, para declarar el idioma de la página web. Esto está destinado a ayudar a los motores de búsqueda y navegadores.

El siguiente ejemplo especifica el inglés como idioma:

```
<!DOCTYPE html>
<html lang="en">
<body>
...
</body>
</html>
```

Los códigos de países también se pueden agregar al código de idioma en el `lang` atributo. Entonces, los dos primeros caracteres definen el idioma de la página HTML y los dos últimos caracteres definen el país.

El siguiente ejemplo especifica inglés como idioma y Estados Unidos como país:

```
<!DOCTYPE html>
<html lang="en-US">
<body>
...
</body>
</html>
```

Puede ver todos los códigos de idioma en nuestra [Referencia de código de idioma HTML](#).

El atributo del título
